PREFACE

The Essential Drug List (EDL) is the repertorium of minimum required medicines for managing most of the day to day prescription trends in public health care facilities. All public health care facilities are required to maintain sufficient medicines from EDL to meet out the need of the suffering humanity. However, as per the approved formulary of Homeopathic medicines, Department can purchase medicines based on requirements & prescribing trends of the physicians.

This is the second publication of EDL from Directorate of AYUSH Govt. of NCT of Delhi. The first publication was in the year 2018. Based on the inputs and requirements from Medical Officers working in dispensaries and teaching faculties working in both Homoeopathic Medical Colleges, namely Nehru Homoeopathic Medical College & Hospital & Dr. B.R Sur Medical College & Hospital functioning under the Directorate of AYUSH, initially published EDL has been amended & updated. This EDL contains 205 Homoeopathic medicines including 98 of 30 potency, 51 of 200 potency, 22 of 1M potency, 7 Biochemics, 6 ointments, 13 Internal Mother Tinctures, 7 External Mother Tinctures and Saccharum Lactis.

I am indebted to the special efforts by the constituted EDL committee for applying their experiences, conceptualization of views from maximum stakeholders and considering the current requisite of health necessities for amendment in the EDL in transparent manner. I hope that this mandate on EDL will be useful in the management of functioning of Homoeopathic health care facilities under the Directorate of AYUSH effectively with optimum utilization of budgetary provision.
